

PICKERSGILLS OFFERS PERFECT POWDER COATING SKILLS FOR DSK ENGINEERING

Pickersgill Electroplating Ltd's powder coating expertise is being put to the test in some of the toughest industrial environments in the world and is passing with flying colours, according to a leading structural fabricator.

Pontefract-based subcontractor DSK Engineering Ltd is praising the part played by fellow Yorkshire company Pickersgills for the success of a range of protective products it manufactures, which not only have to withstand extreme temperatures but also endure the rough treatment and mishandling that can occur to the items in transit, distribution centres and warehouses.

We pre-treat and powder coat different-shaped and sized items made by DSK, and it's the attention to detail as well as excellent customer service, that makes it stand out from the crowd and ensures the long-standing relationship between the two companies.

DSK's development manager, Tris Allison, said: "Pickersgills powder coats a variety of products including steel tool boxes destined for Russia, that have to withstand extreme temperatures, 'goal posts' to protect warehouse structures from fork lift trucks and high visibility bollards to guide HGVs into parking bays. They always do an excellent job."

BOOST TO TRUCK FLEET IS PART OF PICKERSGILL'S ROLLING INVESTMENT PROGRAMME

To cope with a growing order book for its services, we have increased our transport fleet by investing in an additional Iveco seven-and-a-half ton, curtain-sided truck and have plans to purchase more vehicles in the future.

The new 75e16 truck delivers on two fronts for the Leeds-based business. It is more fuel efficient and produces fewer emissions than the rest of Pickersgills' existing truck fleet therefore reduces the company's carbon footprint, while the extra tonnage will provide greater flexibility to manage workloads and maintain production and delivery schedules.

The investment in the transport fleet is part of a structured programme of process and equipment improvements, and comes at an ideal time, allowing the company to offer improved customer service to complement the high quality standards and fast turnaround times for which it

The new vehicle is expected to prove a wise long term investment for Pickersgills which is the latest purchase for the firm.

is renowned.

Pickersgills' general manager, Paul Bertie, said: "With our order books filling up, the new truck is part of a programme of improvements we have undertaken to ensure we have the resources and flexibility to take advantage of any opportunities. We are always looking to better our services and we now have the capability to deliver additional work."

OUR CUSTODIAL LOCKING SYSTEMS GO ON SHOW

Last month we showcased our high quality and robust custodial locking systems and inspection hatches at the National Custody Officers' Seminar and Exhibition in Stoke-on-Trent, organised by the Police Federation of England and Wales.

The design quality and manufacturing strength of our Custodial Class 1 Cell Lock and Custodial Inspection Hatch was well received by detention officers from more than 40 police services across the country.

Our high quality products are all manufactured in the UK providing the safety and reliability that are essential for detention officers.

Pickersgill-Kaye's custodial locking systems and hatches are already used to protect police cells across the country, while due to our continuing export drive we are successfully selling globally to regions such as South East Asia, the Middle East and other EU countries including Ireland.

NEW RAIL LEAFLETS NOW AVAILABLE

Pickersgill has a long history of supplying the rail sector. Our new leaflets for our latest products are now available to download from our [website](http://www.pickersgill-kaye.co.uk).

We have been manufacturing and supplying bespoke door locks and security systems for the rail industry for over 150 years. Our extensive experience within this highly specialist sector has earned us our reputation for high quality, reliable products including external LED train door status indicators, internal and external cab door locks and egress and access devices.

Over the years we have worked with some of the most high profile train companies in the

world and now hold an impressive customer list which includes Siemens, Bombardier, Alstom, Irish Rail, CAF, Jiwon Tech, Rotem, Ocean Eagle and Hitachi to name but a few.
