

A BIG WELCOME TO ALL OUR READERS

Hello

Welcome to the first Joseph Kaye Holdings e-newsletter, combining news from Pickersgill-Kaye and Pickersgills, which we hope you find interesting and informative.

Please feel free to pass on to colleagues or get them to send us an email to news@pk.co.uk so that we can add them to the circulation list.

Many thanks

Peter Murphy
Managing Director

New High Security Multipoint locking range

We are pleased to announce we are now selling direct our own range of high security multipoint locks, bolts and secure access systems. These include surface mounted and mortice versions, emergency and panic exit devices, and specialised function locks with modular lock cases to suit either panic bar, paddle handle or lever operation.

All Pickersgill-Kaye's multi and single point locks are manufactured to the highest technical standards and made entirely in Great Britain.

To download the full catalogue for our **High Security Multipoint Locking Systems** (5mb) please click on the cover image above. For further information please contact us on **0113 277 5531**.

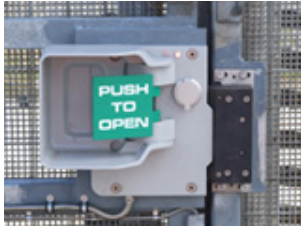

Perimeter security for critical national infrastructure sites

Pickersgill-Kaye's claw and slide bar gate locks are designed for high security access control on perimeter fencing at CNI sites such as power

For further information on all our product ranges and those from our sister company Pickersgills, please click on the links below...

plants, gas terminals, utility companies and military bases.

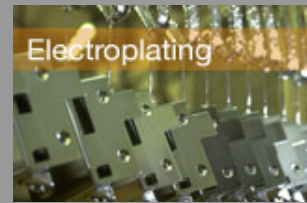

Our claw and slide bar high security gate locks are easily interfaced with existing access control systems. Designed to withstand physical attack, the locks allow for fast and easy emergency evacuation of personnel whilst still maintaining a high standard of external protection.

Both locks have high ingress protection and are fitted in a solid casing suitable for a variety of gate standards. The slide bar version, designed for single or double leaf, features automatic deadlocking and a large slide action bolt throw giving a very secure interaction between gate and frame/gate.

To download the full catalogue for our **High Security Gate Locking Systems** (2mb) please click on either lock image above. For further information please contact us on **0113 277 5531**.
